

Task

Write a function to find the median of three numbers.

Step 1 •

CodeWriter

```
def median_numbers(a, b, c):  
    return sorted([a, b, c])[1]
```

⋮

Step 7 •

CodeTester

“Solution code”:

```
return max([a, b, c])
```

“Test code”:

```
assert median_numbers(25,  
55,65)==55.0
```

⋮

Step 9 •

Environment
